

Tutorial to use QR-Code-Generator under Linux

To use the QR-Code-Generator under Linux you have to Python3 installed!

1. To use it you need customtkinter. You can install it on all platforms with:
`pip install customtkinter`
2. You have to Qrcode installed. You can install it on all platforms with:
`pip3 install QRcode`
3. Install wifi QR-Code:
`pip install wifi-qrcode-generator`
4. You have to installed tkinter (if you want to know, how you can install tkinter show my other Tutorial for the Password Generator!)
5. You have to barcode installed:
`pip3 install python-barcode`
6. You can run the program wih this command (ubuntu example):
`python3 qr-code-generator`
